Office Action Summary	Application No. 10/647,362	Applicant(s) JACQUES, DANIEL R.	
	Examiner PHILIPPE S. DERAQSHANI	Art Unit 3754	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Claims 6-8 and 18 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 6/23/06. It should be noted applicant elected claims 26-8 which were cancelled.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-2, 11-17 and 21-22 are rejected under 35 U.S.C. 102(b) as being anticipated by Altenburger et al.

Altenburger et al show a tank 1, flow controller (63, 65, 43), pump assembly 7, 10 and liquid delivery system 22, 27 and 30.

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3-5 and 23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Altenburger et al in view of Hayes.

Altenburger et al lacks a feed line, an air control valve and a fitting defining a mixing chamber. Hayes shows a feed line 55 to introduce a pressurized gas, an air control valve 60 to adjust the air pressure and a fitting 61 to generate foam. It would have been obvious to one of ordinary skill in the art to have modified the Altenburger et al device with a feed line to introduce a pressurized gas an air control valve and a fitting defining a mixing chamber as taught by Hayes to control the air pressure and to generate a foam.

Re claim 10 official notice has been taken that pressure release valves for pressurized containers are well known and therefore it would have been on obvious choice in design to modify Altenburger with a pressure release valve. Also admits on page 8 that a pressure release valve and a feed line are conventional accessories.

Claims 24-25 are rejected under 35 U.S.C. 103(a) as being unpatentable over Altenburger et al in view of Petit et al.

Altenburger et al lack a mixing medium. Petit et al show a mixing medium 10 to facilitate mixing and to prevent debris from being dispensed. It would have been obvious to one of ordinary skill in the art to have modified the Altenburger et al with a mixing medium as taught by Petit et al to facilitate mixing and to prevent debris from being dispensed.
